

The paper will consist of questions, which expect you to make connections between aspects of the syllabus and apply your skills to question material that may be new to you.

ORGANISATION OF WORK

- Module One will be assessed in January
- Two different teachers will teach the first module
- Lessons will include:
 - Lectures
 - Practical Laboratory Sessions
 - Group Discussions
 - Computer Modelling
- After January, 2 further modules will be taken each delivered by One Teacher

SUPPORTING SUBJECTS

You may wish to take Biology as your only science and combine it with subjects such as History, Art, English or a Foreign Language. Whilst these subjects will not give much support to your study of Biology, you may enjoy the diversity such combinations bring.

POST A-LEVEL (INCLUDING CAREER OPPORTUNITIES)

Biology has a wide range of applications

An A level qualification in Biology could prepare you to study Biology or one of the Biological Sciences in Further or Higher Education.

YOU MAY WISH TO TAKE A MORE VOCATIONAL COURSE LEADING TO A CAREER IN:

- **Medicine**
- **Nursing**
- **Food Marketing**
- **Food Science**
- **Veterinary Medicine**
- **Animal Health**
- **Horticulture**
- **Agriculture**
